Please replace the paragraph immediately before equation (7) with:

“Actions are drawn from a reduced strategy space (RSS) of dimension $r = 2^{m+1}$. Each action is associated with a strategy k and a history $\mu(t)$. There are 2^m histories. Together, all actions by history and strategy (converted for convenience from $\{0,1\}$) can be represented in table form as a $\dim(\text{RSS}) \times 2^m$ binary matrix (i.e., $a_k^{\mu_t} \in \{-1, 1\}$). In this case, the table reads:”
